Table of Contents ›

`<ClientOnly>`

The `<ClientOnly>` component renders its slot only in client-side. To import a component only on the client, register the component in a client-side only plugin.

Props

- **placeholderTag | fallbackTag**: specify a tag to be rendered server-side.

- **placeholder | fallback**: specify a content to be rendered server-side.

```
<template>
  <div>
    <Sidebar />
    <ClientOnly fallback-tag="span" fallback="Loading comments...">
      <Comment />
    </ClientOnly>
  </div>
</template>
```

Slots

- **#fallback**: specify a content to be displayed server-side.

```
<template>
  <div>
    <Sidebar />
    <ClientOnly>
```

```
      <!-- ... -->
      <template #fallback>
        <!-- this will be rendered on server side -->
        <p>Loading comments...</p>
      </template>
    </ClientOnly>
  </div>
</template>
```
